Th MAILING DATE of this communication appears on the cover sheet with the correspond nce address Period for Reply											
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### **DETAILED ACTION**

1. Claims 33-56 are presented for examination. Of originally filed claims 1-32, Applicant filed a preliminary amendment on 1/13/200, canceling 1 and adding claims 33-40. Applicant filed a second preliminary amendment on 1/13/200 canceling claims 2-32. Applicant further filed a third preliminary amendment on 3/2/2000 adding claims 41-44. Applicant further filed an amendment and terminal disclaimer on 11/16/2001, amending claims 33,35,37, 39 and 41-44. Applicant further filed a CPA and a preliminary amendment on 6/7/2003, amending claims 33, 35, 37,39, 41-44 and adding new claims 45-56. Applicant also filed an amendment on 9/23/2003, amending claims 33, 35, 37, 39, 41-45, 47, 49, 51 and 53-56. In light of Applicant's amendment and arguments, the Examiner withdraws the grounds of rejection of claims 33-56 based on 35 USC 103. New grounds of rejection of claims 33-56 are established in the instant office action as set forth in detail below.

### Response to Arguments

2. Applicant's arguments with respect to claims 33-56 have been considered but are moot in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 09/482,032

Art Unit: 3626

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 33-55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Randle, Pat. No. 5,787,403 in view of Damico et al., Pat. No. 5,819,285 (hereinafter Damico).

As to claims 33, 35, 37, 39, 41-45, 47, 49, 51, and 53-56, Randle discloses a method for managing information using an intermediary gateway device having a corresponding network address (i.e. unit 40)(see Fig. 1 and abstract) and, the method comprising the steps of:

receiving a request to communicate with a network accessible datastore having a particular network address (col. 3, lines 36-45);

and

providing access to the network addressable datastore through the intermediary gateway device wherein the intermediary gateway device controls access to the network addressable datastore (i.e. products and services of other providers P1, P2, ..., PN that are accessible through the gateway)(col. 3, lines 27-67).

Randle does not explicitly disclose

modifying the particular network address of the datastore to incorporate the address of the intermediary gateway device and using the modified network address to access the network addressable datastore

However, Randle discloses using a gateway device to control access to datastores (i.e. products and services of other providers P1, P2, ..., PN that are accessible through the gateway)(col. 3, lines 27-67). Damico discloses modifying the

Application/Control Number: 09/482,032

Art Unit: 3626

particular network address of the datastore to incorporate the address of a source device and using the modified network address to access the network addressable datastore (i.e. a destination URL is formed with redirecting means by substituting the destination URL portion in place of the second portion in the URL WHEREIN the destination URL represents a relative address of the second location on the WWW)(col. 3, lines 22-31 and col. 5, lines 38-47). It would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to include discloses modifying the particular network address of the datastore to incorporate the address of a source device and using the modified network address to access the network addressable datastore as disclosed by Damico within Randle. The motivation to combine was tracking user paths on the Web to determine the identity of the entity that directed the user to the current web site for transactional purposes (col. 1, lines 8-15 and col. 2, lines 15-28).

As to claims 34, 36, 38, 40, 46, 48, 50, and 52, Randle does not explicitly disclose, wherein the modifying step further includes the substep of: modifying the particular network address of the datastore to include the address of the intermediary gateway device.

However, Randle discloses using a gateway device to control access to datastores (i.e. products and services of other providers P1, P2, ..., PN that are accessible through the gateway)(col. 3, lines 27-67). Damico discloses modifying the particular network address of the datastore to include the address of a source device

Application/Control Number: 09/482,032

Art Unit: 3626

and using the modified network address to access the network addressable datastore (i.e. a destination URL is formed with redirecting means by substituting the destination URL portion in place of the second portion in the URL WHEREIN the destination URL represents a relative address of the second location on the WWW)(col. 3, lines 22-31 and col. 5, lines 38-47). It would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to include discloses modifying the particular network address of the datastore to include the address of a source device and using the modified network address to access the network addressable datastore as disclosed by Damico within Randle. The motivation to combine was tracking user paths on the Web to determine the identity of the entity that directed the user to the current web site for transactional purposes (col. 1, lines 8-15 and col. 2, lines 15-28).

#### Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Kalinowski, whose telephone number is (703) 305-2398. The examiner can normally be reached on Monday to Thursday from 9:00 AM to 6:30 PM. In addition, the examiner can be reached on alternate Fridays.

If any attempt to reached the examiner by telephone is unsuccessful, the examiner's supervisor, Joseph Thomas, can be reached on (703) 305-9588. The fax telephone number for this group is (703) 872-9306 (for official communications including After Final communications labeled "Box AF").
